MODEL #	LENGTH	DIRECT	OPTIC	VOLTAGE	FINISH

The EVER and EVER Series are offered with a choice of 3 different optic options including a clear diffuser for indirect lighting application ensuring dust protection, a frosted diffuser for Direct, Indirect or Direct/Indirect applications providing a soft non glary distribution and our proprietary Dark Light Louver where controlled light distribution and irridescence control is required.

CLEAR DIFFUSER

Made of extruded PMMA acrylic, the Snap-in-Place clear diffuser is intended to be used as a dust cover for Indirect configurations.

FORSTED DIFFUSER

Made of extruded PMMA acrylic with a proprietary frosting technique. The frosted diffuser is intended to be used in Direct, Indirect or Direct/Indirect lighting distributions for both the Pendant and Wall Series. The Frosted Diffuser is standard on the Series to ensure the desired halo lighting effect.

DARKLIGHT LOUVER

The unique Darklight Louver is made out of a specular aluminum material with a deep T5 parabolic louver design increasing the downward efficiency while providing a glare-free illumination.
