

METRO™

RECESSED

TYPE:

PROJECT NAME:

RECESSED

Metro is a medium-output spotlight with adjustable lighting direction and angle (from 15° to 50°). When the spotlight is oriented downwards, the light is equipped with a diffuser screen covering the inside of its casing. When the light changes its direction, the diffuser screen does so as well, thus dynamically changing the light's shape.

General, complementary, and spot lighting. It will work perfectly at establishments such as clubs, galleries, and hotels, but also as lighting for the office and home.
